Contamination Control SOP

Mandatory contamination prevention for all film and coating work

Purpose

Prevent fisheyes, adhesion failure, and rework caused by environmental and handling contamination.

Rules — non-negotiable

- ☐ No silicone, tire shine, or aerosol products in install bays
- ☐ No cardboard on install tables — use clean work surfaces only
- ☐ Wash hands before handling film; no hand lotion in bays
- ☐ Change tack cloths and blades per panel or when contaminated
- ☐ Close doors during active install — control airflow and dust
- ☐ Pets, food, and drinks prohibited in production bays

Daily verification

Use **Daily Bay Reset Checklist** at open and between jobs when switching service types.
