Vehicle Intake SOP

Standard procedure for every vehicle entering the shop

Purpose

Document vehicle condition, authorize work, and set customer expectations before any service begins.

Scope

All customer vehicles — PPF, tint, wrap, ceramic, detailing. Applies to CS staff and lead technicians at drop-off.

Procedure

Step 1 — Greet and verify appointment

1. Confirm customer name, service scope, and estimated completion date
2. Verify deposit received if required
3. Open job in CRM / work order system

Step 2 — Walkaround inspection

1. Inspect all four sides, roof, glass, wheels, and interior (if applicable) under adequate lighting
2. Document every pre-existing defect on **Vehicle Inspection Form**
3. Photograph all panels and all noted damage — timestamp photos

Step 3 — Authorization

1. Review scope and price with customer
2. Customer signs service agreement and inspection form
3. Collect keys; tag with job number

Step 4 — Bay handoff

1. Move vehicle to assigned bay or queue
2. Notify lead technician via work order
3. Send customer confirmation text with direct contact info

Quality standards

- ☐ 100% of vehicles have signed inspection form before work starts
- ☐ All pre-existing damage photographed and noted
- ☐ Customer receives written ETA and contact method
