SOP-703 — CRM Updates

Forge Standard Operating Procedures v1.0

Section 8: Business Operations

Purpose

Keep customer and job records current so production and follow-up run without gaps.

Scope

Every team member who touches a job. Minimum updates at check-in, start, QC, and delivery.

Procedure

Required touchpoints

1. Lead created → appointment scheduled → vehicle checked in → in production → QC → ready → delivered.
2. Each transition updated same day — no batch updates at week end.
3. Photos uploaded at check-in, post-install QC, and delivery.

Notes standard

1. Notes are factual: what was done, what is pending, who owns next step.
2. Tag team members for handoffs (@lead, @cs).

Quality standards

- ☐ CRM status matches physical vehicle location
- ☐ Zero "where is this car?" calls from CS to bay
