SOP-101 — Responding to Leads

Forge Standard Operating Procedures v1.0

Section 2: Customer Experience

Purpose

Convert inbound inquiries into qualified appointments with consistent follow-up.

Scope

Web forms, SMS, email, social DMs, and walk-in inquiries.

Procedure

Speed to lead

1. Respond within 15 minutes during business hours; within 2 hours after hours.
2. Use template: thank them, acknowledge vehicle/service, ask one qualifying question, offer two appointment slots.
3. Log source (Google, Instagram, referral) in CRM for marketing attribution.

Qualification

1. Confirm vehicle details, desired coverage, budget range if appropriate, and timeline.
2. Send pricing guide or package overview PDF when customer requests ballpark — never guess on complex jobs.
3. Disqualify respectfully if vehicle or scope is outside shop capabilities — refer when possible.

Follow-up sequence

1. Day 0: initial response. Day 1: follow-up if no reply. Day 3: value-add (gallery link, review snippet). Day 7: final check-in.
2. Mark lead lost with reason after 7 days of no engagement.

Quality standards

- ☐ Median first-response time under 30 minutes
- ☐ Lead-to-appointment conversion tracked monthly
