SOP-103 — Vehicle Check-In

Forge Standard Operating Procedures v1.0

Section 2: Customer Experience

Purpose

Document vehicle condition, authorize work, and set expectations before any service begins.

Scope

All customer vehicles — PPF, tint, wrap, TPU, ceramic, detailing. CS and lead tech at drop-off.

Procedure

Greet and verify

1. Confirm customer name, service scope, and estimated completion date.
2. Verify deposit received if required per SOP-106.
3. Open or update job in CRM / work order system.

Walkaround inspection

1. Inspect all four sides, roof, glass, wheels, and interior (if applicable) under adequate lighting.
2. Document every pre-existing defect on Vehicle Inspection Form.
3. Photograph all panels and all noted damage — timestamp photos.

Authorization

1. Review scope and price with customer.
2. Customer signs Service Agreement and inspection form.
3. Collect keys; tag with job number.

Bay handoff

1. Move vehicle to assigned bay or queue.
2. Notify lead technician via work order.
3. Send customer confirmation text with direct contact info and ETA.

Checkpoint: No vehicle enters production without signed inspection form.

Quality standards

- ☐ 100% vehicles have signed inspection form before work starts
- ☐ All pre-existing damage photographed and noted
